AUDITORS' RUSH WORK TOO MUCH.

East Huntingdon Township's
Debt Alleged to Be
\$2,000 Off.

ON THE SCHOOL ACCOUNTS

J. Lyman Loucks Makes Some Sharp
Comments When Republicans Meet
to Suggest Nominations—Taxpayers
Beginning to Get Some Light

SCOTSDALE, Aug. 22.—When the Republicans of East Huntingdon township met at Alverton for a suggestion meeting the first thing that was done was to discuss the manner in which township affairs are being conducted were heard. Justice of the Peace J. Lyman Loucks, acting as chairman, gave utterance to some opinions that caused some of the taxpayers, present to waken up a little. It is likely that they will be wakened a good deal more before the primary election takes place.

That the township debt is much more than reported by the Township Auditors was one of the statements made. Mr. Loucks said that an error in the last school audit amounted to over \$2,000. The hurry with which the auditors perform their duties is blamed for this. It is also claimed that the auditors do not publish their report in any newspaper of the district and that no opportunity was given for the filing of any appeal. Economy in showing how the cash of the taxpayers money is expended is as signed as a reason for the manner in which the work is rushed through. The audit it was stated shows that the township is in debt but a little over \$2,000. Mr. Loucks says that the township is really in debt \$3,000. The failure to find the correct debt it is said is blamed on the auditors not going over the School Board's minutes carefully.

The same condition is said to exist in regard to the Road Super visors accounts. They are claimed to have spent \$2,000 already this year on road work. It is claimed that \$3,000 went unpaid of last year's road tax and that the taxpayers are carrying that amount of interest on the funds. Mr. Loucks suggested that something ought to be done to get the financial condition of the school and road departments in proper condition.

The Republicans of East Huntingdon township then suggest a number of candidates for the township offices for which nominations will be made September 20. This course does not prevent anyone coming out on nomination on papers. For the six year term of School Director there were suggested the names of Dr. A. S. Sherrick of Alverton, Dr. C. H. Poole of Ruffsedale, Charles O. Smith of Ruffsedale, and Fred DeWitt of Ruffsedale. For the four year term there were suggested the names of Robert Hill of Alverton, Byron Kelly of Scottdale, Wm. Ramsay of Buckeye, C. J. Baer of Alverton. For the two year term were suggested the names of William Stoner of Alverton and Ed J. Rose of Central.

COURT DIRECTS PROBE.

Washington County Children's Home
Will Be Investigated

WASHINGTON, Pa. Aug. 22.—(Special.)—Something of a sensation was sprung when a petition was presented to the Court asking for the grand jury now in session to be asked to investigate the conduct of the County Children's Home at Arden, and naming the reasons why this should be done. The court called the grand jury before it and gave instructions necessary for such an investigation and named August 25 as the date for starting the inquiry.

PITTSBURG LAND SHOW

West Virginia to Be Well Represented
This Year

PITTSBURG, August 22.—(Special.)—James Stewart of Morgantown, Director of the West Virginia Agricultural Station was in this city the other day when he signed a contract for a land show to be held here from October 1 to the 15th. Mr. Stewart proposes to let the Pittsburgh world know that as far as agricultural and horticultural opportunities are concerned no state in the Union has any advantages over West Virginia that are even worth mentioning of.

Monday Night.

JOHNSTON FINDS THE PURSE

He Picked It Up Near Postoffice Yes
terday Morning But \$7 in Cash Was
Missing—Returned It to Owner
Upon Learning Identity

The purse containing jewels to the value of \$500 which was lost on a street Monday evening, by Mrs. Arno Shuman, was returned to its owner on Tuesday evening. It was found by John Johnston, a boy who lives near the postoffice. He found the purse on the street and took it to his home. He then took it to the postoffice and turned it over to the police. The police then returned it to Mrs. Shuman.

This is the first time that Mrs. Shuman has recovered her purse since it was lost. She is very grateful to John Johnston for finding it. She is also grateful to the police for returning it to her. She is also grateful to the public for helping her to find it.

THE FIRE HOUSE WILL BE BUILT.

Judge Van Swearingen on
Thursday Dissolved
Injunction.

MORROW'S STRONG FIGHT

Declared That Borough Still Has \$21,000 Leeway After Letting Contract for Fire House Without Exceeding Limit—Higbee in Case

UNIONTOWN, August 17.—The injunction against the erection of the fire house in Conneltsville was dissolved this afternoon at 2 o'clock following arguments of the attorneys. No statement is made by the court except announcement of the order dissolving the injunction. The Conneltsville Construction Company can now proceed with the erection of the building.

Attorney S. John Morrow appearing for Borough Solicitor S. Ray Shelby in the injunction proceedings brought against the Borough of Conneltsville by James H. Yager, George A. Washington, Joseph Beucher and David Titus, who seek to restrain the borough from erecting the new fire house, presented a strong case at a hearing before Judge Van Swearingen at Uniontown this morning. While settlement in Conneltsville had been somewhat pessimistic regarding the outcome of the suit as far as the borough was concerned, Mr. Morrow handled the case this morning in such a manner that the defense presents a remarkably strong case. It is expected the preliminary injunction will be dissolved.

Attorney E. C. Higbee, appeared in the case in the interests of the Conneltsville Construction Company, which was awarded the contract. Mr. Higbee's questions were directed in large measure to the borough's claim. This was explained by the fact that the Construction Company expects to accept certificates of indebtedness in payment for the building and in cases in which the validity of the certificates. The Construction Company's way was placing the borough on trial to show John Duggan Jr. appeared for the plaintiffs.

Mr. Morrow questioned the only witness, Squire A. O. Bixler, borough clerk, and directed his argument to show that instead of exceeding the per cent limit of indebtedness allowed by law the borough will have a leeway of more than \$20,000 after the contract has been awarded. Squire Bixler was the only witness even in the case. Mr. Morrow's argument was that the borough will have a leeway of more than \$20,000 after the contract has been awarded. Squire Bixler was the only witness even in the case.

A. O. Bixler, borough clerk, was at the stand and kept quiet. He said from the minutes of the Council of the borough of April 1, when a resolution was passed to accept the May 11 meeting, showed a resolution to get contract. Squire Bixler was the only witness even in the case. Mr. Morrow's argument was that the borough will have a leeway of more than \$20,000 after the contract has been awarded. Squire Bixler was the only witness even in the case.

S. John Morrow appears for the borough of Conneltsville instead of S. Ray Shelby, John Duggan Jr. represents the plaintiffs.

The objection to building the structure was started on two points. First that it would exceed the indebtedness limit of the property. Second that the resolution passed a year ago at the meeting of the Council did not give the borough the right to build.

It was brought out that the valuation of Conneltsville borough is \$4,958,166, that the indebtedness is \$116,000, that \$20,000 of this is a sewer bond issue was authorized by a popular vote. That the borough has a leeway of \$20,000. Two per cent of the population is \$116,000, that \$20,000 of this is a sewer bond issue was authorized by a popular vote. That the borough has a leeway of \$20,000.

Contractors were shown hearing the signature of the Borough and other proper officers respecting the building of the fire house and a guarantee of the Burgess' refusal to pay for the building of the fire house and a guarantee of the Burgess' refusal to pay for the building of the fire house.

Clark Bixler was the only witness examined. Numerous papers were offered in evidence and the argument was opened by Mr. Morrow.

Newcomer Family Reunion Attended By a Big Crowd at Shady Grove Park.

The Newcomer family reunion at Shady Grove yesterday was attended by upwards of 1500 people. It was a day of thorough enjoyment. Many members of the Newcomer family and friends met who had not seen each other in years. Dinner parties and the sports of the afternoon and following it a basin of meeting was held. A committee was appointed to follow to arrange for the picnic next year to be held at Shady Grove some time in August. Mrs. W. Collier, W. J. Newcomer, D. J. Newcomer and J. D. Woodfill.

The following were the officers chosen for the year: President, W. J. Newcomer; Vice President, D. J. Newcomer; Secretary, D. L. Newcomer; Treasurer, J. D. Woodfill. Excellent addresses that were given were appreciated by the assembly. Songs were delivered by Attorney David P. Paine, Attorney F. C. Newcomer, both of Uniontown and W. S. Blair of Pittsburgh.

COL. ROOSEVELT TAKES ALL BLAME

In the Tennessee Coal & Iron Deal With U. S. Steel

IN A SIGNED EDITORIAL

In the Outlook This Week—Says He Dealt With Conditions as They Existed and Did Not Stop to Look for the Motive.

NEW YORK, Aug. 18.—Emphasizing his desire to shoulder the entire responsibility for permitting the steel trust to gobble up the Tennessee Coal & Iron Company during the past few days of 1907, Col. Theodore Roosevelt declares he has no apologies to offer the public for what he did.

"Nobody need feel either concern or hope as to whether anything done by my administration will be 'discovered,'" he says, "for the excellent reason that there is nothing hidden. It was not my business, neither was it in my power, to search the hidden domain of motive, and my action was conditioned not upon what I believed to be the motives actuating the steel corporation, but upon my belief that the action they proposed taking would be enormous to the benefit of the community at large at that particular moment."

"Whether the chief motive of their action was to absorb the Tennessee Coal & Iron Company, or whether their chief motive was to save the (Moore & Schley, stock brokers) and threatened New York firm from failure thereby stop the panic, was of no question to me. That both motives were in their minds, I thought possible, and still think possible. What was the predominant motive was of no consequence. My concern was that action should be taken and the situation saved in the interests of the people of the United States."

"Most people have short memories, but if anyone will look back and think the situation over carefully he will understand it was not a question of saving any bank or trust company from failure; the question was of saving the plain people, the common people of all parts of the United States from dreadful misery and suffering; and this was what my action did."

"One of the questions put to me indicated disbelief that the action taken was really efficient in stopping the panic. At the time and for some months thereafter, no man would have ventured to express such disbelief unless prepared to be greeted with derision by every human being who knew anything whatever of the actual facts."

"The action taken was in my judgment the only action that could stop the panic, and it most certainly was of enormous, and in all human probability, of decisive influence in actually stopping it."

"Certain other questions related to the enormous value of the coal and ore lands of the Tennessee Coal & Iron Company has no bearing on the purchase of four years ago. The purchase as made did not by itself, affect the status of the steel corporation, so far as the Sherman law was concerned. I dealt with facts as they were, not with facts as they might afterward become."

In connection with the editorial the column also prints his prepared statement which was carried in full in despatches at the time he was on the stand before the Stanley congressional committee.

YOUTH MINERS

Will Hold a Celebration on Labor Day at Sutersville.

The miners of the Youghiogheny valley will hold a monster demonstration at Sutersville in celebration of Labor Day.

Owing to the inability of the committee to secure the services of President John P. White, of the United Mine Workers of America, for September 4, Labor Day, the date for the celebration will be as soon after that as the distinguished official can arrange to be present.

A few days ago, at a meeting of committees from the various unions of the valley, Sutersville was selected as the place for the celebration, in competition with Smithton and a number of other places. In speaking of the coming celebration, a prominent miner said that fully 5,000 underground miners will attend. Orders for this number of badges have been placed, and arrangements for the entertainment of record crowds are being effected. The concert bands of Smithton, West Newton, Collinsburg and Sutersville have been engaged, and various forms of amusement provided for.

The speaking and festivities will be held in Pierce's grove, Elizabeth township. After assembling in Sutersville, the miners will march in a body to the grove.

Gambling Devices Raided. Sheriff P. A. Johns and County Detective Frank McLaughlin Thursday closed all the gambling devices which were doing a land office business at the Bellevernon race meet.

Independent Telephone Company Having Troubles in Redstone.

Trouble is said to be brewing between the eighteen locals which make up what is known as the Big Redstone Telephone Company, with headquarters at Snook.

Some time ago, when the contract with the Tri-State Telephone Company expired, the Bell Telephone Company and the Tri-State company submitted contracts for a connection. The Tri-State's contract was in the form of five propositions, one of which the majority of the eighteen locals voted to accept. Previous to the acceptance of the agreement with the Tri-State company the Big Redstone Telephone Company had been cut off from the outside world because of the expiration of a contract under which the two companies had been working.

The claim is made by some of the officials of the locals that the contract sent by the Bell Telephone Company was not sent to the secretaries of the various locals, but that the propositions as presented by the Tri-State company had been sent out to each secretary of the eighteen locals.

It is said that when the meeting was called to vote on the acceptance of a contract from one or the other

company a number of the officials of the eighteen locals knew nothing of a contract with the Bell company. A majority of the representatives, it is said, voted to accept the proposition offered by the Tri-State company. As a result of this decision the connection was re-established with the company and service was renewed.

Since that time, it appears, there has been trouble brewing. An effort has been made to get a majority of stockholders to ratify the agreement, but all efforts have failed. It is said there is a move on foot to incorporate the company thus operating under one official board, but so many of the stockholders oppose the plan that it is believed to be impossible.

The subscribers of the eighteen locals pay the Tri-State company \$1 a year for service which gives them a free district in the county.

Those known as "insurgent stockholders," it is said, will employ attorneys and will move for the ousting of officials of the Big Redstone Telephone Company, to have the minutes of the meeting of June 25 adhered to and request the Tri-State and Bell companies to submit new contracts.

A BIG ENGINE TESTED ON RUN.

Accurate Account Taken of Trip From Here to Cumberland.

TWO FIREMEN ON THE RUN

Over 1,000 Shovels Full of Coal Are Required Between Connelville and Rockwood—Less Than 600 From There to Cumberland.

The B. & O. seems to be making a systematic study of the economies of railroading these days. The officials seem to be testing the hauling capacity and the running expense of the big engines. Whatever the purpose may be the company, through its district agents is seeking information they never required before. Wednesday evening a freight train arrived at Connelville from Cumberland. It was a test train and between Connelville and Cumberland two of the principal clerks of the B. & O. headquarters in Baltimore were on the train to make notes of all the information required by the officials of the company.

The train started from Connelville Wednesday morning with Engineer J. C. Waddell in charge of the locomotive. There were two women upon the train, J. V. Holland and P. H. Rockwell. The big engine hauling the train was No. 2777. When the train left Connelville it was composed of 60 loaded steel cars. Waddell as an engineer remained at his post throughout the trip from Connelville to Rockwood. From Rockwood to Cumberland the firing was done by Holland. From Rockwood to Cumberland the freeman was Rockwell. The train, which seemed to be a test train for the railway company, was composed of one of the big locomotives and 60 loaded cars. During the trip from Connelville to Cumberland the men shoveled 1,500 shovels full of coal. Of this amount of coal 1,000 shovels full were consumed between Connelville and Rockwood and 500 shovels full between Rockwood and Cumberland.

GIVEN PROMOTION.

Supervisor Samuel H. Kuhn of the Pennsylvania Goes Up.

Mr. Kuhn, who has been supervisor of the division which includes all tracks of the Pennsylvania south of Elverson for two years has done much to improve the division since coming here. It was under his supervision that the improvements were made on the Yough bridge across the Yough river at West Side, Connelville, when the old wooden trestle was torn away and replaced by a new one built of concrete and steel.

Mr. Kuhn's transfer is of the same nature as a promotion as his responsibilities will be greater and the territory much larger. He will be located at Olean, N. Y., and will have charge of a division of the Buffalo and Allegheny Valley railroad, extending from Hinesdale 60 miles from Buffalo, to Emporium Junction.

Sanday Creek Coal & Coke Company Stockholders Will Apply for Charter.

The Sandy Creek Coal & Coke Company, who own 2,200 acres of coal land in West Virginia, met Thursday at Star Junction to arrange for making application for a charter, with O. C. Sarber of Greensburg, O. S. Blair, Andy Carson of Star Junction, H. D. Olbert of Monessen, and A. P. Musie of Ligonier on the application.

This is said to be one of the best coal fields located in West Virginia, being on one of the branches of the Western Maryland railroad now building, and has every prospect of being a producer and has men interested in it from surrounding towns, as well as locally. Among those present at this meeting were: Dr. E. B. Edie, J. S. Lytle

TO START BRIDGE WORK

On Buckhannon & Northern Early in the Coming Month.

The McClintic Marshall Construction Company of Pittsburgh, which has been awarded the contract for the structural bridge work on the new Buckhannon & Northern railroad will begin work by September 15th. The contract was let to the Pittsburgh firm a few days ago and specifies that work shall be started before the 15th and that it be pushed to early completion. The company will put several large forces of men at work at various points along the new railroad and the materials will begin to arrive within the next week or two.

The contract for the ties for the new railroad has also been let. A. Perkins of Rockwood, W. Va., got the job and will furnish the railroad company about 90,000 ties, shipments to be made to Morgantown and Riverside, the ties being distributed from these two points. The contract for the rails to be used on the railroad has not been let.

RUSHING WORK

On the Buckhannon & Northern Railroad in West Virginia.

At present there are six steam shovels at work on the Buckhannon & Northern railroad, the one that is to be the extension of the Pittsburgh & Lake Erie railroad up the Monongahela river through Fayette county and tapping great coal fields in West Virginia.

Williams Brothers & Sons have their shovel in operation opposite Little Falls, one of the big machines of W. W. Gilmore & Company, is plowing the right of way through the federal property at Lee No. 10 and another is at work below Morgantown. The general contractors have a machine at the timon hill, while the second has just been put in operation and Hunter & Hand are clearing out the dirt for the second and third miles of the new railroad.

Work on the railroad is being pushed. The right of way has been practically graded while the removal of the dirt from the big timon hill, recently blasted away, is progressing with rapidity.

FRICK ENGINEERS

Are Popular at Charleston Where They Have Been Working.

In honor of the H. C. Frick civil engineers employed in the vicinity of Charleston, a picnic was given at Elkhart Park Tuesday evening by a number of Charleston young women. The party left for the park on the 6:15 car, taking along baskets of delicacies prepared by the young women. A picnic supper was served. The evening was spent "tripping the light fantastic" and the roller coaster came into large demand also. These composing the party were Messrs. Zellers, Managan, Dancy, Wilson and Caven of Charleston; Miss Elliott of Monessen and Miss Mame Thornton of Brownsville.

The young engineers in the party were Messrs. Thompson, Wahshub, King, Jenkins, Trout, Finch, Patterson and Smith. The engineering corps which has been stationed there for some time will leave that vicinity soon.

LATROBE SEEKING MORE RAILWAYS.

Delegation Here Today Urging West Penn. to Extend Its Lines.

FROM CHAMBER OF COMMERCE

They Are Taken Over the System by Superintendent of Lighting W. R. Kenney After Talking With Officials Here.

Latrobe wants the trolley lines extended and the rich territory surrounding the city developed. That is the business of the delegation which came here today to urge the extension of the West Penn. The delegation consisted of Superintendent M. V. Coffey, Superintendent of Lighting W. R. Kenney, Chief Engineer J. L. Fitch and a number of West Penn. men. The committee not only represented the sentiment of the business men of Latrobe, but that of the farmers along the proposed line in New Alexandria, who held a meeting last evening and strongly endorsed the attitude of the Latrobe Chamber of Commerce on the trolley line proposition.

It was a representative delegation of business men that came here to urge the early building of a line, seven miles long, to New Alexandria, and to also urge the extension of the Latrobe & York Railways Company's line from Youngstown to Hecla, and another line from the main line of the West Penn. and along trolley extension a distance of four miles to the new Latrobe & York line. The delegation consisted of Messrs. J. L. Fitch, Thomas C. Anderson, a business man, and Joseph M. Kelly, a Pittsburgh real estate man, who makes his home in Latrobe. Superintendent M. V. Coffey of the Latrobe Street Railway Company accompanied the party to Connelville.

After talking the matter over with the officials here the delegation was taken over the system in charge of Superintendent of Lighting W. R. Kenney. They inspected the mammoth power plant at Fayette, which makes Latrobe as high as high as day, went on to Uniontown for dinner and then visited the south end trolley line.

John P. Miller had an opportunity to renew old acquaintances here, late and in Uniontown. Years ago he was manager of the West Penn. office here and was the first Republican to hold the office of Register and Recorder in Fayette county. He now conducts one of the leading hotels in Latrobe.

NEW PHYSICIAN REGISTERS.

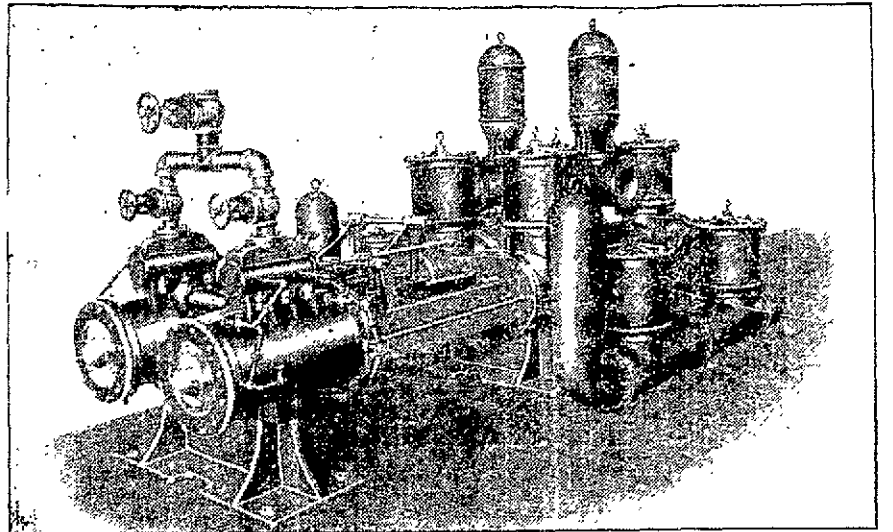

Dr. George B. Marshall will begin his practice at Connelville, Pa., on Monday, September 4th. He was born in Connelville, Pa., and is a graduate of the University of Pennsylvania. He will be in Connelville on Monday, September 4th, and will be in the office of Dr. Marshall on Monday, September 4th.
